1982 Yamaha XJ750 Seca Wiring Diagram

The terms shaft drive and sport bike have always been thought of as mutually exclusive. But in 1981, Yamaha rolled out its 750 Seca, shattering that misconception. The Seca was a combination of shaft drive transmission and sport bike configuration, providing a unique riding experience. It featured a lightweight frame, powerful 750cc engine, and a sleek aerodynamic design, making it a popular choice among motorcycle enthusiasts. The Seca's success led to the development of future models like the XJR1200 and XJ1300, further solidifying Yamaha's position in the sportbike market.
